ТАБЛИЦЫ / ВАРИАНТЫ

18 способов оформить твои таблицы

Прежние пиксельные фоны. Разные композиции, отступы, заголовки и акценты.

01–12

Второй слайд

Три формата, двенадцать вариантов

13–16

10 форматов

Четыре оформления плотной таблицы

17–18

Команда

Два варианта распределения задач

Открой варианты и выбери номера, которые нравятся.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

FORMAT	KEY TRAIT	BEST FIT
PNG	Lossless; supports transparency	Screenshots and graphics with crisp text or edges
JPEG	Lossy; compact for photographs	Photos where a smaller file matters more than perfect detail
WebP	Lossy or lossless; compact	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

FORMAT	KEY TRAIT	BEST FIT
PNG	Lossless; supports transparency	Screenshots and graphics with crisp text or edges
JPEG	Lossy; compact for photographs	Photos where a smaller file matters more than perfect detail
WebP	Lossy or lossless; compact	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Каждая строка отделена от соседних; форматы видны сразу.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

COMPARE	PNG	JPEG	WebP
Key trait	Lossless; supports transparency	Lossy; compact for photographs	Lossy or lossless; compact
Best fit	Screenshots and graphics with crisp text or edges	Photos where a smaller file matters more than perfect detail	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

PNG

KEY TRAIT

Lossless; supports transparency

BEST FIT

Screenshots and graphics with crisp text or edges

JPEG

KEY TRAIT

Lossy; compact for photographs

BEST FIT

Photos where a smaller file matters more than perfect detail

WebP

KEY TRAIT

Lossy or lossless; compact

BEST FIT

Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

COMPARE	PNG	JPEG	WebP
Key trait	Lossless; supports transparency	Lossy; compact for photographs	Lossy or lossless; compact
Best fit	Screenshots and graphics with crisp text or edges	Photos where a smaller file matters more than perfect detail	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Выделена колонка формата, выбранного для проекта.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

	KEY TRAIT	BEST FIT
PNG	Lossless; supports transparency	Screenshots and graphics with crisp text or edges
JPEG	Lossy; compact for photographs	Photos where a smaller file matters more than perfect detail
WebP	Lossy or lossless; compact	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Форматы вынесены в цветные вкладки слева.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

Different files. Different jobs.

Choose a format for the content and its use.

WEBP IN OUR APP

FORMAT	KEY TRAIT	BEST FIT
PNG	Lossless; supports transparency	Screenshots and graphics with crisp text or edges
JPEG	Lossy; compact for photographs	Photos where a smaller file matters more than perfect detail
WebP	Lossy or lossless; compact	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

Part A — Multimedia formats

PNG / JPEG / WebP — same content, different table layouts

01	**PNG**	**Lossless; supports transparency**	Screenshots and graphics with crisp text or edges
02	**JPEG**	**Lossy; compact for photographs**	Photos where a smaller file matters more than perfect detail
03	**WebP**	**Lossy or lossless; compact**	Web images and the attendance preview in our prototype

In our prototype: WebP preview + inline SVG interface icons.

A1. Format comparison

FORMAT	TYPE	COMPRESSION	ALPHA / MOTION	TYPICAL SIZE	SUPPORT	PROJECT USE
PNG	Image	Lossless	Alpha; APNG	Large photos	Broad	UI evidence
JPEG	Image	Lossy	Neither	Small photos	Broad	Photos
WebP	Image	Both modes	Alpha + motion	Compact	Modern	App preview
SVG	Image	Vector / text	Alpha + motion	Tiny icons	Broad	UI icons
MP3	Audio	Lossy	N/A	Small	Broad	Speech / music
AAC (M4A)	Audio	Lossy	N/A	Small	Broad*	Narration
WAV (PCM)	Audio	Uncompressed	N/A	Large	Broad*	Editing master
MP4 H.264	Video	Usually lossy	Motion; no alpha	Bitrate-based	Broad*	Demo delivery
WebM VP9	Video	Usually lossy	Motion; alpha*	Bitrate-based	Modern*	Web playback
MOV H.264	Video	Usually lossy	Motion; no alpha	Bitrate-based	Limited web	Editing / transfer

Container = package. Codec = how the media is encoded.

*Support varies by codec, OS and device. File size depends on content and encoding.
